PREFACE

This document contains estimates of the population by sex and five-year age groups as of June 1, 1982 for Ontario's regions and counties. It continues the series of intercensal estimates published annually (except for Census Years) by Statistical Services Branch.

These estimates are arrived at by the component method on the basis of the results of the preceding census, in this case the 1981 Census. They are **preliminary** and will be revised after the next Census.

The components of population change are estimated on the basis of birth and death information from The Ontario Registrar General, Driver's Change of Address data from the Ontario Ministry of Transportation and Communications, and immigration data from Employment and Immigration Canada.

Population estimates for centres (cities and towns) of 10,000 population and over will be published separately at a later date.

Any enquiries about these estimates should be directed to Dorothy Fetterly at 965-6613.
